
UPGRADE WORKS FOR MAY – AUGUST 2008
Day and night work

23 April 2008

Dear householder,

The Sydney Harbour Bridge is regularly undergoing improvement, maintenance and further upgrading to ensure its longevity. A major program of works has been scheduled with completion planned for mid 2009 to be delivered by BridgeWorks Alliance, a team consisting of the Roads and Traffic Authority, Baulderstone Hornibrook, Connell Wagner and Austress Freyssinet.

Between May and August 2008, materials will be delivered by barges to the underdeck of the bridge, weather permitting. These deliveries will largely occur Sundays to Thursdays between 10pm and 2am.

Materials will also be delivered by road onto the bridge and works will occur on the bridge deck. This work and deliveries will largely occur Sunday to Friday from 9.30pm to 7am. You may also notice materials being loaded and unloaded from cranes and/or cherry pickers from time to time.

There may be some noise associated with the use of equipment and reversing beepers from trucks and the setting up and removal of temporary scaffolding. BridgeWorks Alliance will ensure that all noise at night is kept to a minimum. Lighting will be used at night but will be directed away from nearby residences.

A new water main connection is scheduled to be installed in Alfred Street South, Milsons Point in early May 2008. A small enclosed temporary work site compound will be established on the western side of Bradfield Park immediately adjacent to the car parking spaces in Alfred Street.

There will be temporary traffic control measures in place and impacts on up to six car parking spaces on the eastern side of Alfred Street. An alternate temporary pedestrian footway will be provided. Noise from road excavation equipment and truck reversing beepers can be expected at times. Local residents will be notified of these works closer to the time.

We apologise for any inconvenience during this essential work.

For further information, please contact the BridgeWorks Alliance office on (02) 9463 9444. For out of hours emergencies this phone will divert to a mobile.

Yours faithfully,

Steve Zhivanovich
RTA Interface Manager
