Certification of new trailers up to and including 4.5 tonnes aggregate trailer mass

Purpose

To inform trailer manufacturers and/or distributors of the process for the certification and registration of new or revised light trailers. For the purposes of this Vehicle standards information (VSI) sheet, a light trailer is defined as one with an aggregate trailer mass (ATM) up to and including 4.5 tonnes.

Construction requirements

A light trailer must be designed and constructed to meet the requirements of Vehicle Standards Bulletin (VSB) No. 1 Building Small Trailers issued by the Commonwealth Department of Transport and Regional Services (DOTARS) – see page 2 for contact details.

Registration information

Inspections of light trailers are conducted at:

1. Authorised Unregistered Vehicle Inspection Stations (AUVIS) for:
 - Trailers up to and including 2 tonnes Gross Trailer Mass (GTM) except those fitted with break-away brakes.
2. Heavy Vehicle Authorised Inspection Stations (HVAIS) for:
 - Trailers exceeding 2 tonnes GTM up to and including 4.5 tonnes GTM.
 - All trailers fitted with break-away brakes.

A light trailer may be registered on an individual basis by obtaining a weighbridge ticket and undergoing an appropriate inspection (identity, safety and design check) before registration is established.

Alternatively, manufacturers/distributors may apply to the RTA for certification of a 'batch' of identical trailers. To do this an application form must be completed, along with an appropriate inspection and a weighbridge ticket for the first of each trailer make and model.

For manufacturers/distributors applying for certification and registration of light trailers in New South Wales

For light trailer manufacturers/distributors that undertake the certification process and are:

- An appropriate Authorised New Vehicle Inspection Station (ANVIS), the applicant is exempt from the requirements to present a weighbridge ticket and an inspection report for the registration of each subsequent trailer that has been endorsed by the RTA.
- Not an appropriate ANVIS, the applicant is exempt from the requirements to present a weighbridge ticket and the 'design check' component of an inspection, for the registration of each subsequent trailer that has been endorsed by the RTA. However, the identity and safety check inspection components are still required.

Application process

To apply for a new or revised model trailer to be endorsed by the RTA, the manufacturer/distributor must:

- Obtain a weighbridge ticket for the first trailer of each make and model to be certified.
- Obtain an appropriate inspection report (identity, safety and design check) for the first trailer of each make and model to be certified.
- Complete and sign the form 'Application for certification of new trailer'. A copy of the form is attached to this VSI 52 – photocopy as required.
- Mail the completed form, the original inspection report for each make and model, and a copy of the weighbridge ticket/s to:

Manager, Vehicle Operations and Investigations
Compliance & Freight Strategy
PO Box K198
Haymarket NSW 1240

- The RTA will issue written notification of the endorsed trailers to the manufacturer/distributor who may then arrange for registration of subsequent trailer/s.

Note: To register a trailer immediately without undergoing the application process outlined in this information sheet, present an appropriate inspection report and a weighbridge ticket in person at any RTA Motor Registry and complete an 'Application for Registration' form.

Application for certification of new trailer

This form is intended for the certification of new trailers up to and including 4.5 tonnes aggregate trailer mass. To assist you in completing this form please refer to the notes overleaf and the application process outlined in VSI 52.

Inspection report and weighbridge ticket for each model must be submitted with this form by mail. All fields are mandatory for each model for which certification is sought. Incomplete forms will be returned to applicant for completion before application is processed, which may result in certification delays.

Declaration

Please read carefully before you sign. If you do not tell the truth you can be prosecuted.

My personal information is collected and held by the Roads and Traffic Authority (RTA) 260 Elizabeth Street, Surry Hills, NSW 2010.

I understand my personal information is being collected for registration purposes.

I must supply the information under the Road Transport Vehicle Registration Act

Failure to supply full details and sign/confirm this declaration can result in the vehicle not being certified

My personal information held by the RTA may be disclosed inside and outside NSW to driver licensing and vehicle registration agencies, law enforcement agencies, and to verify and validate the contents of this application and any supporting documentation, for the administration of driver licensing and vehicle registration legislation law enforcement and road safety.

I have a right to access or correct my personal information in accordance with the provisions of the relevant privacy legislation.

I declare that the information supplied is complete, true and correct in every detail and that trailers appearing on this application form are manufactured to comply with the requirements of *Vehicle Standards Bulletin No.1 Building Small Trailers*.

Signature of applicant _____ Date _____

Notes for completing 'Application for certification of new trailer'

The following notes will assist you in completing the form on the previous page. The specifications for up to four (4) different models of the same type of trailer (eg 'boat' or 'box') can be provided on a single form.

'Make'

The manufacturer's name as it appears on the trailer plate.

'Type'

The type of trailer/s for which certification is sought eg 'boat' or 'box'.

'Model designation'

The name that appears on trailer plate as trailer model.

'Tare mass'

Must be shown in kilograms, as it appears on the weighbridge ticket. Note that the original weighbridge ticket for each model must be retained by the applicant.

'Gross trailer mass'

Must be shown in kilograms. The mass transmitted to the ground by the axle or axles of the trailer when coupled to a towing vehicle and carrying its maximum load approximately uniformly distributed over the load bearing area. (see page 9, Vehicle Standards Bulletin (VSB) No.1 *Building Small Trailers*).

'Aggregate trailer mass'

Must be shown in kilograms. The total mass of the laden trailer when carrying the maximum load recommended by the manufacturer. This includes any mass imposed onto the towing vehicle when the combination vehicle is resting on a horizontal supporting plane (see page 9, VSB No.1 *Building Small Trailers*).

'NSW vehicle shape code'

From the following table select the three-letter code that corresponds with the type of body fitted to the trailer eg caravan = CVT.

ACT	Animal carrier	DLT	Dolly	RCT	Roadwork plant carrier
AIT	Air compressor	DTT	Dump truck	RPT	Recreational plant
APT	Agricultural plant	ELT	Electrical plant	RVT	Refrigerated van
BCT	Bulk carrier	EPT	Earthwork plant	RWT	Roadwork plant
BLT	Bolster trailer	FFT	Fire fighting plant	SMT	Semi trailer
BST	Barrier stall/totalisator	HPT	Honey extracting plant	TFT	Table top with fittings
BTT	Boat	IPT	Industrial plant	TKT	Tanker
BXT	Box	JKT	Jinker	TPT	Tipper
CCT	Concrete carrier	LOT	Low loader	TTT	Table top without fittings
CMT	Concrete mixer	OPT	Plant	VCT	Motor vehicle carrier
CVT	Caravan	PAT	Pantechicon	VNT	Van

'Axle code'

From the following table select the axle code that corresponds with the configuration of the axle/s or axle group/s fitted to the trailer eg two axles with 2 tyres per axle = T9.

Trailer with one axle/axle group		Any trailer with a steerable axle or axle group towards its front and an axle or axle group towards its rear	
No. of wheels and tyres per axle	Axle code	No. of wheels and tyres per axle	Axle code
②	T1	② ② or ② ④ or ④ ④	T22
④	T2	④ ② ② or ④ ④ ④	T24
② ②	T9	④ ④ ④ ④	T44
② ④	T3		
④ ④	T4		
② ② ②	T0		
② ④ ④	T5		
④ ④ ④	T6		
④ ④ ④ ④	T8
