Although every effort has been made to ensure the quality of the data, the NSW Roads and Traffic Authority cannot guarantee the accuracy of the data and does not accept responsibility for any consequences arising from its use.

Maps were prepared by RTA Spatial Information Solutions Group with Newcastle Urban base maps provided by Pacific Access Pty Ltd 2000 and all other base maps provided by Peripheral Systems Pty Ltd 1993. Maps may not be reproduced in part or in whole without RTA written permission.

HUNTER REGION CONTENTS

Explanatory Notes 3

Annual Average Daily Traffic Volumes (AADT) on:-

* Classified Roads 7

* Town and City Streets 23

* Unclassified Roads 33

This page has been intentionally left blank

EXPLANATORY NOTES

1.0 INTRODUCTION

This book incorporates the results of a traffic survey undertaken during **2001** in RTA Hunter Region as part of a three year repeating cycle covering the whole of the State of NSW.

The RTA Hunter Region Traffic Volume Data book is comprised of six parts:

- Part 1. AADTs on Classified Roads
- Part 2. AADTs on Town and City Streets
- Part 3. AADTs on Unclassified Roads
- Part 4. Daily Distribution of Traffic Volumes (for permanent stations only)
- Part 5. Hourly Distribution of Traffic Volumes (for permanent stations only)
- Part 6. Traffic Volume Location Maps

2.0 STRUCTURE OF THE PUBLICATION

Part 1 lists the stations and their combined directional (both directions) AADT counts in ascending order of Classified Road number and sequence along each road.

Part 2 lists the stations and combined directional (both directions) AADT counts grouped by Town and City listed in alphabetical order of town and city name.

Part 3 lists the stations and combined directional (both directions) AADT counts on Unclassified Roads in the country areas listed in alphabetical order of LGA name.

Part 4 lists the Daily distribution of traffic Volume by day of week and week of year and includes the percentage of weekly to whole of year traffic volume in order of permanent station number.

Summary statistics presented at the foot of the **Daily Traffic Volume** table are:

- Annual average by day of week and weekly totals
- **AADT** by direction (Annual Average Daily Traffic)
- **AAWT** by direction (Annual Average Weekday Traffic)
- **AAWE** by direction (Annual Average WeekEnd Traffic)
- **AAPH** by direction (Annual Average Public Holiday Traffic)

Part 5 lists the Hourly distribution of traffic volume for a sample week at the Permanent Stations by hour of day and day of week and includes the percentages of average Hourly for weekdays, weekends and whole of week to corresponding total HOURLY traffic volumes.

Sample weeks of Hourly distribution were selected to exclude public holidays and other abnormal influences where possible. Nevertheless Hourly distributions may not be representative of annual average HOURLY traffic patterns.

Summary statistics presented at the foot of the **Hourly Traffic Volume** table are:

- Daily, weekend and weekly totals
- **ADT** by direction (Average Daily Traffic)
- **AWT** by direction (Average Weekday Traffic)
- **AWE** by direction (Average WeekEnd Traffic)

Part 6 presents the scales, indices and maps of the Survey Area.

The set of maps consists of:

- Regional Map Scales
- Newcastle UBD Uquivalence Table
- List of Local Government Areas
- State Index Map
- Regional Legend
- Regional Index Map
- Regional Maps
- Newcastle Index Map
- Newcastle Legend
- Newcastle Maps
- List of Town Maps and Scales
- Town Maps

The Locations of traffic counting stations are indicated on the maps by a red dot, with a joining line to the station number and associated AADT value below the station number.

Stations without AADT values attached were either not counted in year 2001 because of their exclusion from the survey or else the AADT values calculated were deemed to be “untrustworthy”

3.0 STATION TYPES & AADT DEFINITIONS

Traffic survey sites are either designated as **sample (short survey duration)** stations or as **permanent (continuous survey duration)** stations. As either axle pair passes or actual vehicles may be counted, the Annual Average Daily Traffic (AADT) value is represented as either:

- The number of **vehicles** passing during a 24 hour period averaged over a year **OR**
- The number of **axle pair** passes during a 24 hour period averaged over a year

The number of axle pair passes, for example a typical car, is represented by one axle pair, a three axle truck by one and a half axle pairs and a six axle semi trailer as three axle pairs.

It should be understood that AADTs measured by counting vehicles is **not** equivalent to AADTs measured by axle pair passes.

AADT is measured by axle pairs at urban and rural sample stations, rural permanent stations and a few urban permanent stations.

AADT values in parts 1, 2 and 3 are for combined directions. Hourly and daily traffic counts by direction in parts 4 and 5 are indicated by a suffix to station number:

N	=	Northbound
S	=	Southbound
E	=	Eastbound
W	=	Westbound
C	=	Combined (Non directional)

4.0 SYMBOLS EMPLOYED

The symbol (V) indicates AADT measured by vehicle counts and the symbol star (★) indicates AADT measured by axle pairs, **BOTH AT ONLY PERMANENT STATIONS.**

The symbol (V) or the star symbol (★) is affixed to AADT values by year in parts 1,2 and 3 to differentiate between AADT types where a station has changed between sample and permanent status or has changed from permanent axle pairs to permanent vehicle counts between surveys.

The symbol (V) for vehicle counts or the symbol star (★) for axle pairs is **ALSO** affixed to station number in parts 1, 2, 3 and 6 (maps) where a station is permanent for **AT LEAST THE 2001 SURVEY YEAR**. As a station may previously be a sample site, confirmation of permanent status for earlier years can be made with reference to parts 1, 2 and 3 only.

If a station has had permanent status for all the survey years presented, then the symbol (V) or symbol star (★) is affixed to station number **ONLY** in parts 1, 2 and 3. No symbols are then affixed to AADT Values.

Eg

STATION	LOCATION	MAP	Km	1986 AADT	1988 AADT	1990 AADT	1992 AADT	1995 AADT	1998 AADT	2001 AADT
05.485	AT HUNTER RIVER BR	38	34.1	--	1351	--	1502	1528	2213	2337*
V05.194	NEATH-AT RLY XING	40	21.2	10090	10483	10823	11106	11862*	11844V	12246V
V05.196	BRUNKRV'LE-1.6KM N OF MR392,M'SET RD	40	13.6	5001	8428	12690	12864	6944	7510	8110

This was a sample site in 1988-1995 counting axle pairs. In 1998-2001 it was a permanent site counting **axle pairs**.

This was a permanent site in 1995 counting **axle pairs**. From 1998, it is still a permanent site but counting **vehicles**.

This "V" indicates that this station is **Permanent** in the current count year (2001), counting **vehicles**. Furthermore, since the status of this site has remained constant over the years shown in the Table, the individual traffic volume numbers are **not** individually tagged to indicate the method of data collection.

5.0 STATION STATUS

Station status is identified as :-

Sample station with all AADT values measured by axle pairs but not indicated by symbols anywhere in text or maps.

Permanent station with all AADT values measured by vehicle counts indicated by the symbol (V) or as **permanent station with all AADT measured by axle pairs** indicated by the symbol star (★) against station number in parts 1,2 and 6 (maps), (not in parts 4 and 5).

Stations changed between sample and permanent status with corresponding changes in AADT values between vehicle counts and axle pairs, are differentiated by affixing AADTs measured when permanent status (only), by either the symbol (V) for vehicle counts or by the symbol star (★) for axle pairs in parts 1, 2 and 3 only.
