Improving bus on-time running in Canterbury, Earlwood and Kingsgrove

Transport for NSW has identified some ways to improve the reliability of buses in the Canterbury-Bankstown Local Government area.

Transport for NSW and Roads and Maritime Services asked the community for feedback between February and March 2017 on a proposal to make changes to some bus stops in Sydney’s southern suburbs along bus routes 412, 423 and 428.

We received feedback from 215 people and organisations. We would like to thank everyone for their comments. The feedback included comments about access to bus services, additional walking distances and project justification.

We summarised the feedback with our responses in a Submissions Report which can be viewed at www.rms.nsw.gov.au/bpp.

BACKGROUND

These changes are part of Sydney’s Bus Future, the NSW Government’s plan to redesign Sydney’s bus network to meet customer needs now and into the future. In this plan, our customers tell us that travel time and on-time running are some of the most important service features. For more information on Sydney’s Bus Future, please visit www.transport.nsw.gov.au/sydneys-bus-future.

These changes have been developed by Transport for NSW and Roads and Maritime, in consultation with Sydney Buses. Local councils were consulted as part of the early planning work.

KEY OUTCOMES OF THE PROPOSAL

- Contributing to the NSW Government’s target of 95 per cent on-time running of bus services
- Making travel times more reliable for customers.
