The NSW Government is funding this project as part of its program to ease congestion and improve travel times on Sydney’s busiest corridors.

Roads and Maritime Services is making improvements to the intersection of Princes Highway with Kingsway, Oak Road and Acacia Road, and the intersection of the Acacia Road with President Avenue to help improve traffic flow, travel times and safety for all road users.

There are currently high volumes of vehicles travelling in both directions on President Avenue and Princes Highway. Delays are often caused by turning vehicles blocking through traffic. This project aims to ease congestion at these intersections and improve journey reliability for all road users.

**Project benefits**

The benefits of the improvement include:

- Improved operation of Princes Highway along the corridor and at the intersections with Acacia Road, Oak Road, Kingsway and President Avenue
- Improved safety at the intersections, with a reduction in the number of rear-end crashes and crashes involving motorists changing lanes
- Reduced traffic delays and a better flow of traffic for motorists at all points along the corridor.
**Work to date**

Since work started in April 2018 we have:

- moved services to accommodate the water main
- set up the site compound
- started work to upgrade the central median on Princes Highway
- started to relocate utilities on Princes Highway and President Avenue
- moved the median strip and relocated the traffic lights at President Avenue
- closed access to Kenneth Avenue to and from Princes Highway.

**What’s happening next?**

- Night works will continue along Princes Highway and President Avenue
- The drainage works at Acacia Road south at President Avenue intersection is due to be completed in early December
- The current works on Princes Highway median will continue in preparation for traffic changes in late October/early November
- Right turns from Princes Highway into Oak Road in both directions will be permanently closed
- From October 2018 to January 2019 the Princes Highway and President Avenue intersection will open in stages.

**Traffic changes**

The right turn from Princes Highway onto Oak Road will be permanently closed in both directions, beginning at the upcoming traffic switch.

There will be other temporary traffic changes during our night work to ensure the work zone is safe. Speed limits during night work will be reduced to 40 kilometres per hour.

Please keep to speed limits and follow signs and traffic controllers’ directions. To minimise disruption there will be no lane closures or speed limit changes during day work.

**How will the work affect you?**

We will do everything that we can to minimise the impact of the work, including completing noisier tasks by midnight and staging them in different locations.

There may be restricted access to some properties during work hours. Access will be managed by traffic control staff for residents and businesses. Pedestrian and cycle access will be maintained during the work.
Our work schedule

We will be on site for up to six days a week and up to five nights a week for 55 shifts over 18 weeks between 2 October 2018 and Friday 15 February 2019, weather permitting.

Our day work hours will be between 7am and 6pm from Monday to Friday and 8am to 1pm Saturdays.

Our night work hours will be between 8pm and 5am from Sunday to Friday. We will not be working on public holidays.

Works will be winding down in late December for the Christmas shutdown from 24 December 2018 until the 4 January 2019.

Noise management

Roads and Maritime understands that noise during road construction can be a source of frustration for residents living near our project.

We are committed to finding the right balance between minimising the impact to residents and the need to complete the road construction for the wider community.
